

Digital Printing

With new advances in printing technology, Monarflex is now able to offer digital printing of any logo or digital image up to 2 metres high and 39 metres long onto any of the Monarflex Flame retardant rolls of scaffold sheeting.

The inks used are rain and UV resistant to ensure images remain true for at least six months. This enables the replication of marketing materials traditionally found in sales offices into a super large format on the construction site scaffolding, which will attract attention.

Features

- Full colour images
- Any size logo or picture up to 2 mtrs high and 39 mtrs long, printed on a 2 m x 45m roll;
